

ATHARVA GADGE

Data Science & Machine Learning Enthusiast

+91-7875494909 | gadgeathu07@gmail.com | linkedin.com/in/atharva-gadge-03a5b8309 | github.com/gadgeatharva-it

Summary

Results-oriented fresher in Data Science and Machine Learning, skilled in Python, SQL, and end-to-end data workflows including preprocessing, EDA, feature engineering, and model evaluation. Experienced in building and tuning classification and regression models with measurable outcomes. Seeking to apply analytical and machine learning expertise to solve impactful, real-world business problems.

Skills

Programming & Data Handling: Python (Pandas, NumPy), SQL

Machine Learning: Supervised Learning (Classification, Regression), Model Training, Hyperparameter Tuning, Model Evaluation (Accuracy, Precision, Recall, F1-score)

Data Science & Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Hypothesis Testing, Data Interpretation

Data Visualization: Matplotlib, Seaborn, Power BI, Tableau, Advanced MS Excel (Pivot Tables, Charts, Dashboards)

Databases & Querying: MySQL, Joins, Aggregations, Subqueries

Tools & Technologies: Jupyter Notebook, Git/GitHub, VS Code, ETL Concepts

Experience

Data Science Training | *Edunet Foundation* 2024

- Performed data cleaning, EDA, and statistical analysis on real-world datasets using Python, Pandas, and NumPy
- Built visualizations using Matplotlib and Seaborn to communicate data-driven insights
- Derived actionable business insights from structured datasets to support data-informed decisions

Projects

Crime Hotspot Detection & Analysis System – India | *Python, GIS, PostgreSQL* Mar, 2024

- Analyzed 3,70,000+ crime records to identify high-risk zones using K-Means clustering
- Applied K-Means clustering to identify high-risk crime zones and segment hotspots geographically
- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) using Pandas and NumPy
- Built interactive geospatial visualizations and heatmaps using Folium for spatial insights
- Integrated PostgreSQL for efficient storage and querying of structured crime data
- Generated actionable insights to support crime monitoring and resource allocation strategies

ML Analysis of E-Commerce Consumer Transactions | *Python, Research Paper* 2025

- Applied K-Means clustering to segment customers into 3 groups — high-value, moderate, and low-engagement
- Achieved 91 % accuracy (XGBoost) across 3 models on 50K+ transaction records
- Forecasted monthly sales using ARIMA and Prophet, reducing forecasting error by 12% compared to naive baseline
- Authored and submitted a research paper on customer segmentation and sales forecasting (under review)

Awards & Certifications

- **Tata Group** – Data Visualisation: Empowering Business with Effective Insights (Jun 2025)
- **Deloitte** – Data Analytics Job Simulation (Apr 2025)
- **Google** – Data Analytics Certificate, Google Skills (2025)
- **Oracle** – Cloud Infrastructure 2025 Certified Generative AI Professional (Sep 2025)
- **Microsoft & SAP** – Foundation Course on IR4.0 Technologies, TechSaksham (2024–25)

Education

B.Tech Information Technology CGPA: 8.3/10

DBATU University, Raigad, Maharashtra

Languages: English (Basic), Hindi (Native), Marathi (Native)
